## *Foreword*

We, the staff of PANTHER '55, have strived to make an annual which would present our school as you would like to remember it. In years to come may you turn through these pages and recall the happy days at Pattison School.

The Panther of 1955 is dedicated to Mr. Cloice E. Myers who has been the Superintendent of Pattison for two and a half years. Under his guidance and leadership the Pattison school system has become one which parents and students can well be proud.

We regret that Mr. Myers has chosen to leave at the close of this school year. We know however, that every member of this community wishes him and his family only the best of good fortune for the future.

Students, Teachers, Parents, Friends of Pattison High School:

We are closing a very successful year this month. Your accomplishments in the many phases of school life, both curricular and extracurricular, have been too numerous to mention. You are to be congratulated on the fine spirit of co-operation which has made all this possible.

We have set as one of the ultimate goals for our school, the development of an atmosphere in which young people could learn to be good citizens in our community as well as learn the basic subject matter such as reading, writing, and arithmetic. One has only to observe the behavior of our students as they go happily about their schoolwork to know that we as students, teachers, and friends of education in our community have been successful in an amazing way. It is an unparalleled joy to be a part of a team capable of accomplishing this task.

Personally, I wish for each of you a continuation of the satisfying and successful life you have had this year. As we leave your community it is with sincere appreciation for the splendid co-operation all of you have given us. We shall miss our many friends in this area, but assure you that you will not be forgotten.

Very truly yours,

Cloice Myers

Cloice Myers

Students of Pattison High School:

As opportunities come and go, we must decide for ourselves which of these we shall take advantage of. The purpose of the school is to provide each child with new experiences, opportunities and challenges that, if accepted and used in the right manner, will help to prepare him or her for the solving of problems and the making of decisions that will face them in future life.

Education is a challenge and a privilege as well as an opportunity and so many only half-heartedly accept it, yet this is something that thieves and robbers cannot break through and steal from you. Nothing can take its place. It is an essential part of the democratic way of life. Education is our most effective weapon against crime, ignorance, proverty and filth. Who is it that does not want what a good education offers? Time will soon send the opportunities into the past and beyond your reach. Count them as precious gold and gladly accept them because each is a rung in the ladder of life.
